1965 Ford Mustang GT - You are viewing a 1965 Ford Mustang Fastback GT. And yes, its a factory 4 spd!! After performing a thorough inspection and past inspections with documentation, we believe this is a real GT. I would describe this car not as a restored car, but a car that has been preserved and maintained its whole life. Has the A code 289 4 Brl motor producing 225 HP. Motor was completely rebuilt less than 500 miles ago. Color is the original X code Vintage Burgundy with Black interior. Car

has an older paint job that still shines and looks amazing, but has a few minor cracks and nicks. Body is Laser straight with no issues. Interior looks amazing! All gauges work except clock, including the Factory Tach. Has rare factory console option. Undercarriage is unbelievably clean! A professionally done floor pan replacement on driver side was done. All the rest of the undercarriage is original and still has original oxide primer showing. Over the years as I mentioned parts were replaced or rebuilt as needed. Vintage Ac was added many years ago. Was done properly using the original switch and controls. When I purchased the car, the air was not blowing cold. I had the AC system completely redone and updated. Replaced everything that needed to be replaced. Now AC blows hard and ICE COLD!!!! If you are interested in this car, I ask that you please come see it in person and drive it. Yes I can describe the car but only you can understand how unbelievable this car drives by driving it. I have a drive on lift in my shop so you can walk under the car and all around this car to see just how nice it is. Have many receipts showing work done. Also have many registrations showing that this has been a west coast car its whole life. The gentleman that I purchased car from had owned it for over 20 years. Not only is this highly collectable, but you can drive this one. Get in and drive it anywhere!!!
